

Your first download, ready to open.

Simple Mass Downloader - Sample brief

This is an original sample file for testing a small download batch.

It contains one page, with no form fields, scripts or external resources.

Check your result

1. Confirm this PDF opens and this text is readable.
2. Check that the filename matches the name you expected.
3. In the extension, check the result for this file before moving on.

A readable sample demonstrates this transfer, not every future download.

Source access and browser limits still apply to other files.

You may download and reuse this sample for testing.
